Nancy Vasquez

2. The Task Groups shall have the following functions and responsibilities:

Task Group 1

- a. Undertake the necessary field survey and quality assurance activities on horizontal, vertical and gravity networks including the upgrading and establishment of tide stations;
- b. Establish, manage and maintain a network of active geodetic stations;
- c. Conduct pilot projects to establish and document standardized practices, procedures and specifications;
- d. Maintain and improve the management of field survey data and geodetic databases as well as publish national geodetic reference books and operationalize the national GNIS; and
- e. Perform other tasks as may be directed by the undersigned.

Task Group 2

- a. Develop more appropriate geodetic transformation methods and parameters;
- b. Develop and document standardized practices and specifications for data processing, analysis, integration and databasing;
- c. Develop a more appropriate surface-fitting procedure and derive the most suitable geoid model and geocentric datum;
- d. Develop appropriate transformation and integration schemes and procedures and oversee their implementation; and
- e. Perform other tasks as may be directed by the undersigned.
