2. Number of hits/access to the online database		60,000	60,000	60,000	60,000	240,000	85,277	82,260	80,212	85,666	333,415	93,415	The increase in high hits was basically due to the stakeholders frequent access of the Lot Plotter Map App, wherein the general public has the option to plot online the boundaries of their owned land based on technical description for the purpose of verifying the accuracy of its shape and location. On the other hand, the downloading of selected NAMRIA layers categorized as "open" contributed to the high hits of the Geoportal Philippines Website. It is also noted that the download page of the NAMRIA website continued to have high hits due to the availability of downloadable maps, publications, and other resources.
Output Indicators													
1. Number of maps and charts produced or updated and published		8	105	1310	615	2,038	8	105	1,351	574	2,038		Deliverables for 1:4,000 large-scale maps were produced in advance (3rd Quarter)
2. Percentage of clients who rated the quality of maps and charts produced as satisfactory or better		97%	97%	97%	97%	97%	99.94%	99.90%	100.00%	100%	99.96%	2.96%	All clients rated the quality of maps and charts as satisfactory and very satisfactory. None gave a negative rating for the fourth quarter. The high satisfaction rating is attributed to the agency's efforts to further enhance its quality management system and provision of quality geospatial products and information to the public.
